The Journal International Accounting, Auditing and Taxation (JIAAT) has a H index of 16, an impact factor of 0.25, a SNIP rating of 0.644 and a SJR rating of 0.323. JIAAT has a B rating in the ABDC 2010 list.

In contrast, Journal Accounting, Auditing and Finance (JAAF) has a H index of 10, an impact factor of 0.75, a SNIP rating 0.570 and a SJR rating of 0.579. JAAF has an A rating in the ABDC 2010 list.

Accounting and Finance has a H index of 17, an impact factor of 0.646, a SNIP rating of 0.267 and a SJR rating of 0.689. Accounting and Finance is rated A in the ABDC 2010 list.

The request is to upgrade the rating of Journal of International Accounting, Auditing and Taxation to A, the same as Journal of Accounting, Auditing and Finance as JIAAT has a much greater H index (16 versus 10) and a higher SNIP rating (0.644 versus 0.570). JIAAT also has a fairly similar H index to Accounting and Finance (16 versus 17). However, the SNIP rating for JIAAT is much higher than for Accounting and Finance (0.644 versus 0.267).

The SJR Indicator measures the scientific influence of the average article in a journal, it expresses how central to the global scientific discussion an average article of the journal is. Cites per Doc. (2y) measures the scientific impact of an average article published in the journal, it is computed using the same formula that journal impact factor™ (Thomson Reuters).

Citation vs. Self-Citation

30/05/2013
Evolution of the total number of citations and journal's self-citations received by a journal's published documents during the three previous years.

Evolution of the number of total cites per document and external cites per document (i.e. journal self-citations removed) received by a journal's published documents during the three previous years.

Cites per Document in 2, 3 and 4 years windows

30/05/2013
Evolution of Citations per Document to a journal's published documents during the two, three and four previous years. The two years line is equivalent to Journal Impact Factor™ (Thomson Reuters) metric.

International Collaboration

International Collaboration accounts for the articles that have been produced by researchers from several countries. The chart shows the ratio of a journal's documents signed by researchers from more than one country.

Journal's Citable vs. Non Citable Documents

Not every article in a journal is considered primary research and therefore "citable", this chart shows the ratio of a journal's articles including substantial research (research articles, conference papers and reviews) in three year windows.

Journal's Cited vs. Uncited Documents

30/05/2013
Ratio of a journal's items, grouped in three years windows, that have been cited at least once vs. those not cited during the following year.
