FORM C: ABDC 2013 JOURNALS LIST REVIEW
RATING UPGRADE SUBMISSION

*** PLEASE NOTE THAT: *** FORM C is designed to formalise requests to the ABDC Journals Review Panel 2013 seeking an upgrade in rating of an academic journal which is currently included and rated in the ABDC 2010 list e.g. seeking to raise a rating from a “B” to an “A” journal. Please complete a separate form relating to each journal for which you wish to make a submission of this type.

Journal Title: Production and Operations Management

QC1. FIELD of RESEARCH (FoR) PANEL to which this request is directed (tick one box only):
- 0806 Information Systems
- 1401-1499 Economics
- 1501 Accounting
- 1502 Finance
- 1503 Management
- 1504-07 Marketing/Tourism/Logistics
- 180105/1801025 Business and Taxation Law

QC2. WHAT ABDC 2013 RATING DO YOU PROPOSE FOR THIS JOURNAL?
- [x] A*
- [ ] A
- [ ] B
- [ ] C

QC3. WHAT ABDC 2010 RATING WAS THIS JOURNAL ASSIGNED?
- [x] A*
- [ ] A
- [ ] B
- [ ] C

QC4. WHAT ERA 2010 RATING WAS THIS JOURNAL ASSIGNED?
- [x] A*
- [ ] A
- [ ] B
- [ ] C
- [ ] not applicable

QC5. NOMINATE “THE BEST” COMPARATOR JOURNAL (journal from the ABDC 2010 list that is most similar in research quality): Journal of Operations Management

QC6. JOURNAL INFORMATION
Editor’s Name: Prof. Kalyan Singhal
Institution: University of Baltimore

NATURE OF SUBMISSION

QC7. Primary submitter type (tick one box only)
- [ ] Higher Education Institutional Submission (e.g. formal submission from Business Faculty/School)
- [ ] Peak Body Submission (e.g. AFAANZ, ANZAM)
- [x] Individual Submission

QC8. Primary submitter: Dr Jyotirmoyee Bhattacharjiya
Institutional Affiliation: The University of Sydney

QC9. Are there other signatories to this submission? [x] Yes [ ] No
If yes, how many signatories are there (including the primary submitter)? 9
As Production and Operations Management (POM) is internationally recognized as a flagship research journal in the field of manufacturing, operations and supply chain management.

The journal has an excellent editorial board and has published the works of scholars from many leading international business schools (see App. C1 and C7).

Articles published in POM are similar in quality to articles published in Journal of Operations Management and Decision Sciences Journal (currently recognized as A* by ABDC and ERA). Recommendations from editors of both these journals are included in App. C3 along with recommendations from eminent scholars based in institutions such as Cornell University, Harvard Business School, MIT, Stanford, INSEAD, Indian School of Business, Erasmus University and others.

POM is included in Business Week's list of 20 premier journals, the Financial Times list of top 45 journals and the University of Texas at Dallas list of 24 journals. Only seven of the 44 journals currently recognized by the ABDC as A* are listed by all three (see App. C4).
SUPPLEMENTARY INFORMATION: APPENDIX CHECKLIST

The ABDC invites further supplementary and supporting information to be submitted by way of appendices.

QC11. What supplementary information are you supplying (by way of appendices) to support your submission?

The following documents are attached in support of this application (please tick boxes as relevant):

- [x] Appendix C1: List of Editorial Board Members
- [x] Appendix C2: Description and Scope of Journal
- [x] Appendix C3: Recommendations from eminent scholars in the relevant field
- [x] Appendix C4: Comparisons with existing rated journals
- [x] Appendix C5: Coverage in review articles
- [x] Appendix C6: Impact Factors: SSCI or others
- [x] Appendix C7: Other supporting documentation
- [x] Appendix C8: Signatory Details – in cases where there are more than one signatory to the submission, list all signatory names and their university or relevant affiliations (this appendix should articulate with the answer given to QC9 above).

Appendix C2 Description and Scope of Journal

Overview

The mission of Production and Operations Management is to serve as the flagship research journal in operations management in manufacturing and services. The journal publishes scientific research into the problems, interest, and concerns of managers who manage product and process design, operations, and supply chains. It covers all topics in product and process design, operations, and supply chain management and welcomes papers using any research paradigm.

Aims and Scope

The mission of Production and Operations Management is to serve as the flagship research journal in operations management in manufacturing and services.

The journal publishes scientific research into the problems, interest, and concerns of managers who manage product and process design, operations, and supply chains. It covers all topics in product and process design, operations, and supply chain management and welcomes papers using any research paradigm.

Appendix C3 Recommendations from eminent scholars in the relevant field

The following recommendations are included here:

(i) Open letter from the Fellows of the Production and Operations Management Society to Deans and Department Chairs

(ii) Prof. Gabriel Bitran, Sloan School of Management, Massachusetts Institute of Technology

(iii) Prof. Joseph Blackburn, Owen Graduate School of Management, Vanderbilt University

(iv) Prof. Thomas Choi (email), Co-Editor-in-Chief, JOM, W.P. Carey School of Business, Arizona State University

(v) Prof René de Koster, Rotterdam School of Management, Erasmus University

(vi) Prof Cheryl Gaimon, Ernest Scheller Jr. College of Business, Georgia Institute of Technology

Prof. Asoo J. Vakharia, Editor-in-Chief, Decision Sciences Journal, Warrington College of Business Administration, University of Florida

Prof Luk N. Van Wassenhove, INSEAD
Dear Deans and Department Chairs:

We, the Fellows of the *Production and Operations Management Society* (POMS) that serves academic communities from over 45 countries, write to endorse *Production and Operations Management (POM)* as a flagship journal in the field of production and operations management (OM).

*POM* celebrates its 20th anniversary this year under the leadership of its founding editor Professor Kalyan Singhal. He has led unceasing efforts to improve the relevance and rigor of *POM* by having leading scholars in OM serve on the editorial board. To date, *POM* has achieved the following milestones:

- **Worldwide Recognition.** *POM* is the only management journal with an OM focus that is recognized by all three key research ranking lists: *Business Week*, *Financial Times*, and *UT Dallas Business School research ranking*.

- **Rigor & Relevance.** *POM* is one of the broadest leading OM journals, publishing papers that advance both theory and practice of OM, and address commercial and societal issues including product development, supply chain management, manufacturing/service/retail, sustainability/crisis management, humanitarian relief, health care, and social responsibility.

- **Breadth & Depth.** *POM* is a top journal that embraces a full range of methodological approaches to OM research, ranging from analytical to behavioral and from empirical to field-based research.

Because *POM* has become an essential outlet for leading edge OM research, we hope you will support us in ensuring that *POM* is considered a top-tier OM journal for purposes of hiring and tenure decisions.

To: The Australian Business Deans Council

I request you to assign a rating of A+ to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A+ rating in a list in which 149 journals have A+ rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

For six years I served as Editor-in-Chief of the journal Management Science which has an A+ rating on your list, and can attest to the high academic quality of POM.

Please let me know if you need additional information.

Sincerely,

Gabriel Bitran
Professor Emeritus

77 Massachusetts Avenue E6-593, Cambridge, MA 02139 USA
The Australian Business Deans Council

Dear Council Members:

I request that you assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to the creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks. This important discipline is underrepresented on your list of 149 A* journals which includes only one journal, the Journal of Operations Management, dedicated to the discipline.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely,

Joseph Blackburn
James A. Spyer Professor of Management, Emeritus
Owen Graduate School of Management
Vanderbilt University
You list Production and Operations Management as a B journal. POM is a clear A* journal. Most of the top 50 business schools in the US rank this journal in the same category as Management Science, Journal of Operations Management, and Operations Research.

Tom

Thomas Y. Choi, Ph.D.

Dear sir/madam,

With this letter I would like to suggest you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business Week list of 20 journals, the Financial Times list of 45 journals, and the University of Texas at Dallas list of 24 journals. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which it appears. The journal’s editorial team represents leading business schools in the world and several leading corporations. At Rotterdam School of Management, Erasmus University, the EJL is used, in which the journal is ranked as P* (top A). For us, publications or R&Rs in POM are a qualifier for hiring tenure track faculty.

POM is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

In short, within the area of production and operations management, the journal belongs to the A* list.
Please let me know if you need additional information.

Sincerely yours,

René de Koster
May 23, 2013

To: The Australian Business Deans Council

I understand the Australian Business Deans Council is in the process of rating business and business-related journals. I am writing to urge you to rate Production and Operations Management (POM) an A*. (POM belongs to the Management section, Code 1503).

POM is the flagship research journal of the Production and Operations Management Society (POMS), which is the world’s largest academic society with members from over 45 countries. The society is dedicated to the creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

POM is already on three key lists of leading journals that are used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jmdal.utdallas.edu/the-udt-top-100-business-school-research-rankings/]. Moreover, POM is one of the 17 journals that appears on all three lists.

My experience with POM is extensive and includes serving as an author, reviewer, and Department Editor. In my view, the authors who publish in the journal and the journal’s editorial team represent almost all leading business schools in the world, as well as several leading corporations.

In closing, I hope the above discussion helps to convince you that POM is worthy of your top A* rating. Please let me know if you need additional information about POM.

Sincerely,

Cheryl Gaimon
May 22, 2013

To: The Australian Business Deans Council

Re: Request to consider assigning a rating of A* to Production and Operations Management (POM) journal

Dear Council Members,

I am a Professor of Operations Management at the Samuel Curtis Johnson Graduate School of Management at Cornell University. I serve as the Department Editor for retail operations for Production and Operations Management (POM), and an Associate Editor for Management Science, Operations Research, and Manufacturing & Service Operations Management (M&SOM).

I am writing this letter at the request of Professor Kalyan Singhal, Editor-in-Chief of POM, in order to provide my strong support to assigning a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is one of the four premier journals for business school faculty in Operations Management, including POM, Management Science, Operations Research, and M&SOM. The journal publishes the highest quality research articles and is used as one of the main journals for tenure considerations in Operations Management. The editors of POM comprise leading researchers in the field of Operations Management. These qualities of POM are reflected in its recognition on all three key lists of leading journals used to rank business schools:

- the Business-Week list of 20 journals,
- the Financial-Times list of 45 journals, and
- the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/].

In fact, POM is one of only 17 journals that are on all three lists.

POMS, the academic society that POM is affiliated with, is the world’s largest academic society with members from over 45 countries dedicated to the creation and dissemination of knowledge in topics that are critical to any business or industrial organization. Topics published in POM include:

- Behavioral operations
- E-Business
- Healthcare operations
- Inter-disciplinary research at the interface of operations management with Accounting, Economics, Finance, and Marketing
- Management of Technology
I have published three articles in this journal in the last ten years. These articles have been highly cited. One of them has been widely covered on the Knowledge@Wharton website.

*POM* is clearly one of the foremost academic journals in Operations Management. It strongly deserves an A* rating in your list on the basis of merit as well as because of the effect of this rating on the choice of journals that Australian business school faculty will make. Recognizing *POM* with this rating will provide a valuable incentive for Australian business school faculty to publish their research in a top journal such as *POM* and have it be recognized among leading research papers in the Operations Management field.

I thank you for your consideration and would be happy to provide any additional information you need.

Sincerely,

Vishal Gaur
To: The Australian Business Deans Council

As the current co-Editor-in-Chief for the Journal of Operations Management (which currently has a ranking of A* on your list), I request you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely,

V. Daniel R. Guide, Jr.
Smeal Professor of Supply Chain Management
Co-Editor-in-Chief, Journal of Operations Management
25 May 2013

Dear members of The Australian Business Deans Council,

I request you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC Journal List. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Businessweek list of 20 journals, the Financial Times list of 45 journals, and the University of Texas at Dallas list of 24 journals (http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/). It is one of the 17 journals that are on all the three lists and it certainly deserves to have an A* rating in your list in which 149 journals have A* rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks. As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Please also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

At my school (our MBA program has been ranked among the world’s top ten by the Financial Times in the last four consecutive years), POM is considered as one of the top journals for academic reviews in the field of Operations Management (OM). I regularly write tenure review letters for OM candidates at top business schools (e.g., Wharton, Kellogg, UC Berkeley, NYU) and I always consider POM a top journal in evaluating these tenure cases.

Please let me know if you need additional information.

Sincerely yours,

Albert Ha

To: The Australian Business Deans Council

I am writing to request that you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-udt-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists. It is also designated as an A* journal in the internal list of journals used here in the Ross School of Business. As a former editor-in-chief of Management Science, which is one of the 149 A* journals on your list, I think that POM clearly deserves to have an A* rating as well.

POMS is the world’s largest academic society in the operations area with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely yours,

Wallace J. Hopp
Associate Dean for Faculty and Research
May 23, 2013

Dear Australian Business Deans Council:

I am delighted to comment on behalf of the research journal, *Production and Operations Management* (POM). POM is the flagship research journal of the Production and Operations Management Society (POMS). As a matter of categorization, POM belongs to the Management section (Code 1503) of the ABDC list. Given its international reputation, POM should certainly be assigned an A* in the ABDC list of journals.

POM is a leading research journal within the world’s top business schools. The journal is on both premier lists used to rank business schools: the *Businessweek* list of 20 journals and the *Financial Times* list of 45 journals. Given that the very top business schools around the world focus on these two rankings, POM certainly deserves an A* rating.

The Production and Operations Management Society (POMS) is the world’s largest academic society with members from over 45 countries. It is dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: product and process innovation, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks. Authors of the papers published in POM and the editorial team of the journal represent nearly every leading business school in the world. It is unimaginable that ABDC would not give POM an A* rating.

If you have any questions about POM, please don’t hesitate to contact me.

Sincerely,

M. Eric Johnson
May 22, 2013

To: The Australian Business Deans Council:

I am writing to request you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

I am a scholar in the production and operations management field, was former Editor-in-Chief of Management Science (a journal that was rated A* in your list), and a member of the US National Academy of Engineering.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely,

Hau L. Lee
To: The Australian Business Deans Council

I am hereby writing to you to make a request to assign an A* rating to the journal Production and Operations Management (POM) in your ABCD list of journals. POM is the flagship research journal of the Production and Operations Management Society (POMS). POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists and I believe that it does deserve an A* rating in a list in which 149 journals have an A* rating.

POMS is the world’s largest academic society dedicated to the creation and dissemination of knowledge on topics that are critical to all types of businesses and industrial organizations. The topics range from innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks. POMS has members in over 45 countries.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world as well as a number of the world’s leading corporations. Also see an attached letter from POMS Fellows (all senior academics at leading business schools) addressed to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely,

Michael Pinedo

To: The Australian Business Deans Council

I request you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely,

[Signature]

As a former faculty at the Australian School of Business and a current board member of POM, I request you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-ud-top-100-business-school-research-rankings//]. It is one of the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

To: The Australian Business Deans Council

I would like to express my support for the assignment of an A* rating in the ABDC list of journals to *Production and Operations Management* (POM), the flagship research journal of the Production and Operations Management Society (POMS). POM belongs to the Management section (Code 1503) of the list.

*POM* is on all three key lists of leading journals used to rank business schools programs: the *Business Week* list of 20 journals, the *Financial Times* list of 45 journals, and the University of Texas at Dallas list of 24 journals (http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/). It is one the 17 journals that are on all three lists, and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is one of the world’s largest academic societies with members from over 45 countries dedicated to creation and dissemination of knowledge in the areas critical to any business organization: product and service innovation, manufacturing and service operations, supply chains, sustainability and global operations.

The authors of the papers published in the journal and the editorial team of the journal represent many leading business schools and several leading corporations. Additional supporting information on POM journal are provided in an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider *POM* a top journal for purposes of hiring and promotion decisions.

Please let me know if you need additional information.

Sincerely,

Sergei Savin

To: The Australian Business Deans Council:

I request you to assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1503) of the list.

POM is on all three key lists of leading journals used to rank business schools: (a) the Business-Week list of 20 journals; (b) the Financial-Times list of 45 journals; and (c) the University of Texas at Dallas list of 24 journals [http://jindal.utdallas.edu/the-utd-top-100-business-school-research-rankings/]. It is one the 17 journals that are on all three lists and it certainly deserves to have an A* rating in a list in which 149 journals have A* rating.

POMS is the world’s largest academic society with over 2,000 members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

As an attached list shows, the authors of the papers published in the journal and the editorial team of the journal represent almost all leading business schools in the world and several leading corporations. Also see an attached letter from POMS Fellows, who are senior academics at leading business schools, to business school deans requesting them to consider POM a top journal for purposes of hiring and promotion decisions.

110 Westwood Plaza, Gold Hall

To: The Australian Business Deans Council

I would like to endorse that you assign a rating of A* to Production and Operations Management (POM), the flagship research journal of the Production and Operations Management Society (POMS), in your ABDC list of journals. POM belongs to the Management section (Code 1505) of the list.

POM is on all three international lists of journals used to rank business schools: the Business-Week list of 20 journals, the Financial-Times list of 45 journals, and the University of Texas at Dallas list of 24 journals. It is one of the 17 journals that are on all three lists and in my opinion deserves to have an A* rating in your list.

The journal is sponsored by the POMS which is the world’s largest academic society with members from over 45 countries dedicated to creation and dissemination of knowledge in topics that are critical to any business or industrial organization: innovations in products and processes, manufacturing and service operations, supply-chain management, sustainable operations, and global supply networks.

If you follow the following link:
http://www.poms.org/journal/departments/
you can see that the editorial team of the journal represent almost all leading business schools in the world as well as several leading corporations.

In addition, by following the following link:
you can also view a letter from the POMS Fellows (all senior academics at leading business schools) to business school deans endorsing the journal as being one of the major outlets for research in the area.

Finally, I would like to mention that I am the current Editor of the Decision Sciences Journal (rated as an A* journal on your list) and feel that POM also deserves a similar/identical rating on the list. Please let me know if you need additional information.

Sincerely,

Asso J. Vakharia
McClatchy Professor
Editor, Decision Sciences Journal
